CAREER OBJECTIVE

Enthusiastic Computer Science Engineering student with hands-on experience in full-stack development and deep learning-based intrusion detection systems. Seeking an entry-level product/software development role to build scalable web and enterprise applications.

TECHNICAL SKILLS

Programming: C, C++, java (Basics), Python

Frameworks: .NET (Basics), WPF (Learning), WCF (Familiar)

Web Technologies: HTML, CSS, JavaScript, React

Core CS: Data Structures & Algorithms, DBMS, SQL

AI / ML: CNN, LSTM, GRU, Deep Learning Basics

Tools: Git, GitHub, VS Code

PROJECTS

Deep Learning-Based Intrusion Detection System (IDS)

Python, TensorFlow/Keras, Scikit-learn, CNN, LSTM, GRU, NSL-KDD

- Designed and implemented an intelligent IDS using the NSL-KDD dataset to detect network intrusions.
- Built and evaluated multiple models including CNN, LSTM, GRU, SVM, and Random Forest.
- Compared models using accuracy, precision, recall, and F1-score to identify the best-performing architecture.
- Developed a real-time attack prediction and alerting pipeline to identify abnormal traffic behavior.

Smart Appointment Booking System

MERN Stack, Three.js, JWT, REST APIs

- Developed a full-stack appointment scheduling platform with secure authentication and role-based access.
- Implemented real-time booking, slot management, and scalable MongoDB storage.
- Designed an interactive 3D user interface using Three.js to enhance user experience.
- Built reusable React components and integrated frontend with RESTful backend APIs

Student Information System

HTML, CSS, JavaScript

- Built a responsive web application for student registration, login, and profile management.
- Implemented client-side validation and secure login workflows.
- Designed a mobile-friendly UI ensuring accessibility across devices.

EDUCATION

B.E. in Computer Science Engineering

Rao Bahadur Y. Mahabaleswarappa Engineering College, Ballari

CERTIFICATIONS

- Generative AI – Microsoft & LinkedIn
- Network Fundamentals – Alison
- UI/UX & Networking – Great Learning
- TCS iON Career Edge
- Deloitte Technology Job Simulation

ACHIEVEMENTS

- Secured **1st place** in Coding Club competition for developing a web page using HTML and CSS.
- Built Smart Appointment Booking System during **Codefiesta National Hackathon (24 hours)**.
- Completed a 5-day IoT workshop conducted at RYMEC.
- Secured **1st place** in AI Quiz conducted by Kimo.ai.
